Per 1972 Handbook for Analyzing Jobs, p. 111 - Example of definition of WF 102 - Structural Fabricating-Installing-Repairing:

"Fabricating and installing-repairing structures or objects, the elements of which are static (i.e. involve mechanisms no more complex than hinges, links, or catches) and may require shaping by any combination of *Abrading, Bolting-Screwing, Boring, Brushing-Spraying,* Jobs involving only one of these work fields are listed thereunder. Distinguish from *Mechanical Fabricating-Installing-Repairing and Machining.*"
